BUCK LADDER TETHER

128R

The Buckingham Ladder Tether (BLT) (for use with an approved IAA 375lbs rated, 28' maximum length, fiberglass extension ladder with a V-rung) creates a ladder mounted lifeline system allowing the user to ascend and descend 100% fall protected. The BLT utilizes specially designed

ladder lock straps to secure the ladder to the pole before ascending. A ladder mounted anchor strap secures the lifeline to the ladder. Lifeline includes ANSI Z359.15 rated BuckArrester™ system allowing for 100% fall protection on ascent and descent. The BuckArrester™ design

and plastic rope keep provides the user with smooth, hands free up and down tracking, allowing user to maintain the required 3-point contact at all times. In the event of a fall, the BuckArrester™ will arrest the fall while the ladder lock straps keep the ladder secured to the pole.

INCLUDES:

**BuckArrester™
System
5004BQ2**

**Ladder Lock
System
355TQ2**

**Ladder FP
Anchor Strap
3912**

**Retro Ladder
Tether Lifeline
39Y8Q2-length**

RECOMMENDED:

**BLT Full Body
Harness
U601A3Q1**

Note: The BLT is only intended for use with IAA approved ladders, 28' maximum length, from Little Giant, Louisville, Werner or Green Bull. Additionally, the BLT must be used with the sternal attachment point of an ANSI Z359.11 compliant full body harness. We recommend Buckingham's **U601A3Q1**.
